

# Santander Consumer Bank AG

## Key Rating Drivers

**Support and VR Drive IDRs:** Santander Consumer Bank AG's (SCB AG) Issuer Default Ratings (IDRs) are driven by its individual financial strength as reflected in its Viability Rating (VR) and by the strong support from its ultimate and intermediate parents, respectively Banco Santander, S.A. (Santander; A-/Negative) and Santander Consumer Finance S.A. (SCF; A-/Negative).

**VR Off RWN:** The removal of the VR from Rating Watch Negative (RWN) reflects Fitch Ratings' view that the economic fallout from the coronavirus crisis now represents a medium-term risk to SCB AG's VR rather than a near-term risk, as anticipated when we placed the VR on RWN in April 2020. SCB AG's Negative Outlook mirrors the Outlook on Santander and SCF.

**Deep Integration Underpins Support:** We believe that Santander's and SCF's propensity and ability to support SCB AG are high, due to the bank's deep integration, shared brand name and small size relative to the group. SCB AG predominantly offers car financing and unsecured consumer finance, which is a core activity for the group. We expect Santander to increase SCB AG's capital to support organic growth and acquisitions whenever needed as it did in the past.

**Pandemic Pressurises Profitability:** The Negative Outlook on SCB AG's earnings and profitability score reflects our expectation that muted new business in 2Q20 will weigh on net interest and commission income, while loan impairment charges (LICs) are likely to rise significantly. We believe SCB AG has the potential, as one of very few large German banks, to continue to earn its cost of capital through the crisis and maintain its profitability well above the sector average. This is in the context of its sound interest margins in consumer finance.

**Asset Quality to Weaken:** SCB AG entered the crisis with a low non-performing loan (NPL) ratio of 1.8% at end-2019 (based on Fitch's calculation). The recessionary economic environment is likely to pressurise SCB AG's consumer finance portfolio, which is inherently vulnerable to rising unemployment. The asset quality implications of the pandemic are not yet clear because state support measures will delay the deterioration of borrowers' credit quality until 2021.

**Adequate Capitalisation:** Our assessment of SCB AG's capitalisation includes ordinary group support as the bank relies on capital injections from the group to back sizeable loan growth or acquisitions. The bank does not generate capital as it usually up-streams its full annual profits to its German parent based on a control-and-profit transfer agreement although, as part of the group's capital planning, SCB AG has some flexibility to retain some of its profits.

**Increasingly Diversified, Flexible Funding:** Highly granular retail deposits will remain SCB AG's main funding source despite its rising proportion of covered and unsecured bonds. SCB AG's large stock of auto and consumer loans enables flexible management of its liquid assets, which consist of ECB-eligible retained ABS.

## Rating Sensitivities

**Weaker Group Support:** SCB AG's IDRs are primarily sensitive to changes in Santander's or SCF's ability to support, as reflected in their IDRs. A downgrade of Santander's or SCF's IDRs would likely trigger a downgrade of SCB AG's VR, which benefits from ordinary group support. The sale of a sizeable stake in SCB AG, or a decline in its strategic importance for Santander, could reduce the group's propensity to support. However, we view these scenarios as highly unlikely.

**Unexpectedly High Credit Losses:** We may downgrade SCB AG's VR if the economic disruptions caused by the pandemic intensify, making a swift economic recovery in 2021 and 2022 less likely, potentially weakening revenue generation and driving credit losses significantly above our base case expectations.

**Debt Rating Classes**

Rating Level	Rating
Deposit ratings	A/F1
Senior preferred	A/F1
Senior non-preferred debt	A-

Source: Fitch Ratings

The senior non-preferred (SNP) debt rating is aligned with the Long-Term IDR, as we expect the bank to meet its resolution buffer requirements with SNP and more junior debt.

The Short-Term IDR of 'F2' is aligned with those of Santander/SCF, and is the lower of the two options mapping to its Long-Term IDR of 'A-', because SCB AG's liquidity and funding score of 'bbb+' rules out a higher Short-Term IDR.

The DCR, long-term senior preferred (SP) debt and deposit ratings are one notch above the Long-Term IDR to reflect the protection accruing to preferred creditors from SNP and more junior resolution debt and equity buffers. SCB AG is part of the same resolution group as SCF and Santander. We expect it to source its resolution debt buffers from the parent. The short-term SP debt and deposit ratings of 'F1' are the lower of the two options mapping to the respective long-term ratings of 'A'. This is because the liquidity and funding score of 'bbb+' rules out higher short-term ratings.

**Significant Changes**

**Economic Outlook Rapidly Worsening**

The ultimate economic and financial market implications of the coronavirus pandemic are unclear, but Fitch considers the risks to German banks' credit profiles to be clearly skewed to the downside. We revised our sector outlook for German banks to negative in December 2019 to reflect, at the peak of the credit cycle, the domestic banking sector's inability to generate adequate returns during periods of strong economic growth due to its structural weaknesses.

In addition, we lowered the operating environment score for German banks to 'aa-/Negative from 'aa/Stable in April 2020 as the coronavirus pandemic exacerbates banks' vulnerability to a rapid and severe deterioration of earnings and asset quality. The negative trend signals that we could lower the operating environment score further if there are signs that the German economy will suffer in the longer term from the crisis, or if the domestic banking sector is unable to restore acceptable profitability above pre-crisis levels. Such a situation would be likely to require greater pricing discipline and consolidation to remove excess capacity from the sector.

The German government has launched large support programmes to support companies and households affected by the crisis. Together with regulatory forbearance for the classification of crisis-driven NPLs, these programmes have strongly mitigated negative rating migration, risk-weighted assets (RWA) inflation and provisioning needs in 1H20 and will continue to do so in 2H20. However, credit quality is likely to deteriorate in 2021 as some vulnerable borrowers will not fully recover, and many corporates and SMEs are likely to emerge from the crisis with weaker credit profiles.

**Sixt Leasing Acquisition**

SCB AG's joint venture with Hyundai, Hyundai Capital Bank Europe, acquired in July a majority stake in Sixt Leasing SE, a medium-sized German car leasing provider (it had lease assets of EUR1.1 billion at end-1H20). The transaction diversifies SCB AG's client portfolio, while also increasing the weight of its auto leasing business. Therefore, we expect car financing to continue to dominate the bank's business model, earnings and risk profile in the foreseeable future, despite its slow diversification into mortgages, SME lending and asset management.

## Key Financial Metrics – Latest Developments

### Pandemic Drives Increase in Impaired Loans

SCB AG's asset quality has benefited from strong pre-COVID 19 economic conditions. The NPL ratio fell to 1.8% in 2019 from 2.1% in 2016 (based on Fitch's calculation), supported by SCB AG's solid underwriting standards and regular NPL sales. In April 2020, we changed the Outlook on asset quality to negative as part of the COVID-19-driven review of German banks.

We believe the economic fallout from the pandemic will weigh in the next two years on SCB AG's asset quality, which largely correlates with the development of unemployment. The pandemic is likely to lead to a strong increase in the number of insolvencies in Germany at end-2020 for businesses that are over-indebted due to the coronavirus crisis, but are otherwise solvent, after a law suspending the obligation for companies to file for insolvency lapses at end-3Q20. We estimate, in our base case, SCB AG's NPL ratio to remain below 3% by end-2021. In addition, we expect the government's support measures to mitigate credit losses.

### Strong Profitability, Robust First Line of Defence

SCB AG's strong pre-impairment income offers ample flexibility to absorb risk costs from the likely deterioration of its consumer finance portfolio, its dominant asset class which is inherently vulnerable to rising unemployment in a recessionary environment. We expect SCB AG's strong management expertise and execution record, along with a well-tested risk management framework in consumer finance, to make the expected deterioration in credit quality and provisioning requirements in this asset class controllable.

We estimate, in our base case, SCB AG's operating profit/RWAs to exceed 1.5% through the crisis. SCB AG's earnings resilience is supported by its above-average pricing power derived from its sound German consumer finance franchise.

### Capital Benefits from Ordinary Support

Under the control-and-profit transfer agreement, SCB AG up-streams its full annual profits to its German parent Santander Consumer Holding although, as part of the group's capital planning, SCB AG has some flexibility to retain some of its profits for investments and growth. Fitch believes that Santander/SCF would inject additional capital to SCB AG to enable significant loan growth or large acquisitions if needed. SCB AG received a capital injection of EUR101 million in 2013 intended to finance the acquisition of Santander Consumer Leasing GmbH. Since then, the bank did not require any capital injection, though we believe that the group is likely to support the recent acquisition of Sixt Leasing SE, which increases SCB AG's RWAs.

We believe that SCB AG's Common Equity Tier 1 (CET1) ratio will remain stable at about 13%, which is reflected in the stable outlook on SCB AG's capital score, as we expect the bank to remain clearly profitable through the crisis. We expect capital support from Santander/SCF would be forthcoming if SCB AG experienced material crisis-induced RWA inflation.

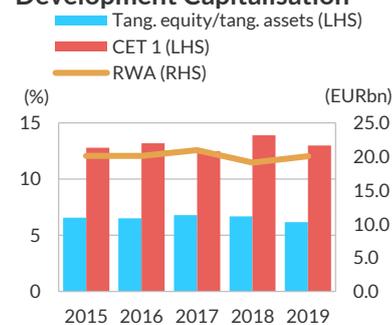

SCB AG's high Basel III leverage ratio of 7.0% at end-2019 reflects its high share of unsecured loans, which results in a fairly high RWA density of 44% at end-2019. The bank expects minimal RWA inflation from the output floor to be implemented as part of the Basel III reform until 2027. This seems plausible given its small exposure to secured real-estate loans, which are generally among the most sensitive to the output floor.

### Gradually Diversified Funding Profile and Adequate Liquidity

SCB AG's main source of funding are retail deposits, which SCB AG has significant flexibility to increase by raising its deposit remuneration if needed, given its profitability, which has been consistently among the strongest in the German banking sector. The bank issued its initial covered bond in 2017 and issued a further EUR500 million in 1Q20, bringing the total outstanding to EUR1 billion at end-1H20. SCB AG's mortgage stock is decreasing, due to amortisations more than offsetting its mortgage origination. Nevertheless, Fitch expects further covered bond benchmark issuances in the short/medium term.

SCB AG issued its initial SNP debt in 2017 and SP note in 2019, which increased the diversification of its funding profile. The bank makes extensive use of retained auto and consumer ABS as collateral to access the ECB's targeted longer-term refinancing operations. Its commercial paper programme established in 2018, provides additional flexibility to address short-term funding needs.

## Environmental, Social and Governance Considerations

SCB AG's highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact, either due to their nature or the way in which they are being managed by the bank.

### FitchRatings Santander Consumer Bank AG

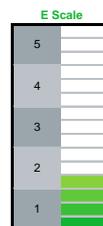

**Banks**  
Ratings Navigator

#### Credit-Relevant ESG Derivation

Santander Consumer Bank AG has 5 ESG potential rating drivers ▶ Santander Consumer Bank AG has exposure to compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security) but this has very low impact on the rating. ▶ Governance is minimally relevant to the rating and is not currently a driver.	key driver	0	issues	5
	driver	0	issues	4
	potential driver	5	issues	3
	not a rating driver	4	issues	2

#### How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

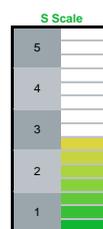

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

Sector references in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

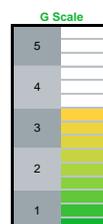

#### Social (S)

General Issues	S Score	Sector-Specific Issues	Reference

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in but are not solely responsible for the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
